

# Innovation as the driver for an energy resilient Baltic Sea Region

Julia Lindholm, Head of Swedenergy EU Office

A woman is lying down in a dark room, looking up at a tablet computer held above her. The scene is dimly lit, with the light from the tablet illuminating her face and hands. The overall mood is serene and focused on technology.

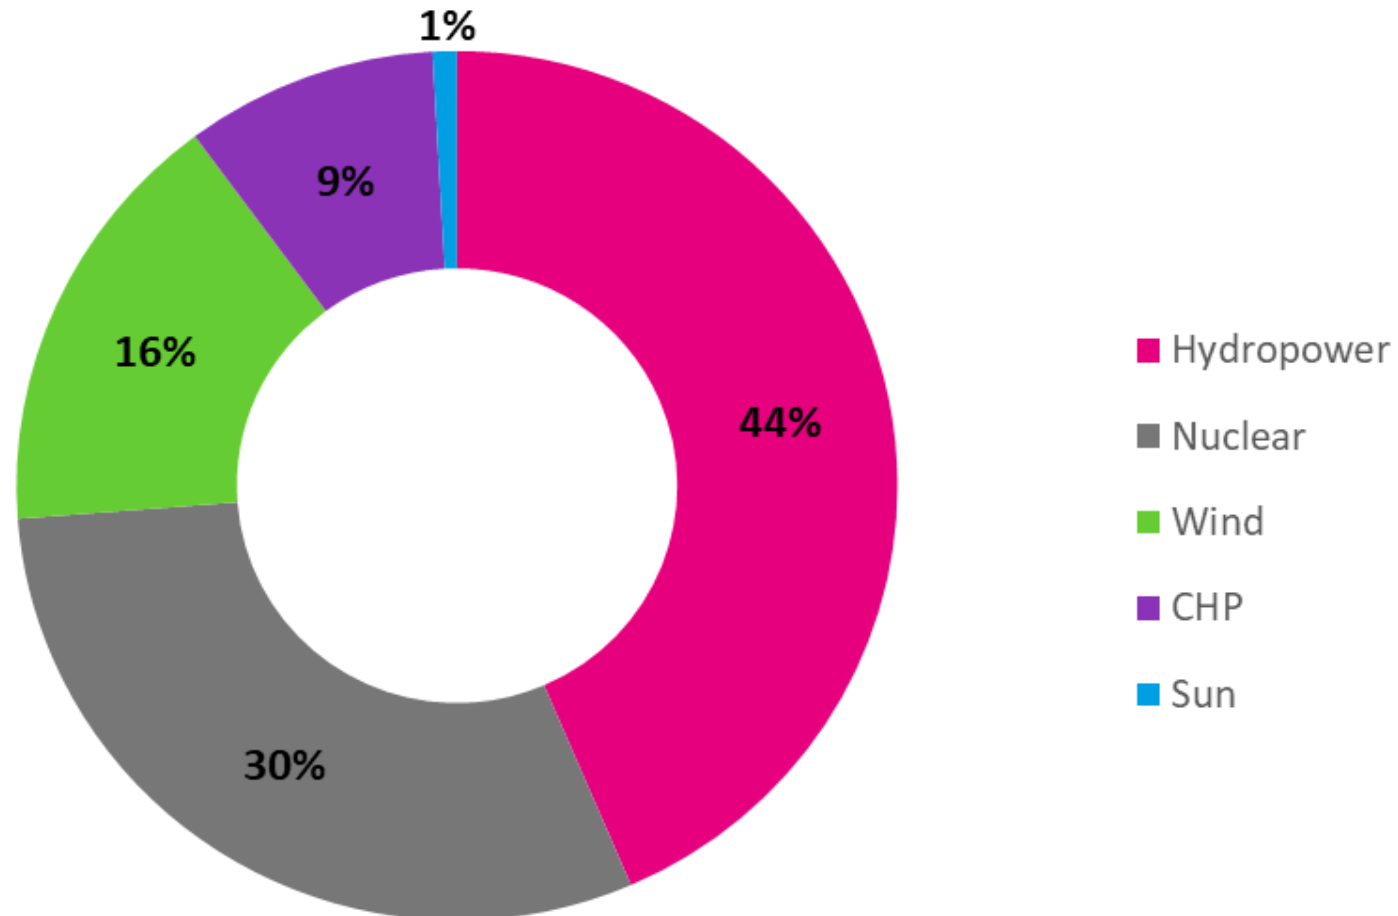

Swedish electricity

98%

carbon free

# Electricity mix 152 TWh (2020)

# Consumer Flexibility

- In Sweden, everyone has smart meters today.
- Active consumers- Commitment among customers to influence their electricity consumption.
- We see a movement towards hourly contracts
- Lack of hard ware components and a lack human resources challenge to make heating/housekeeping more energy efficient.
- Regulatory framework must enable incentives to be flexible.

# Elprisområden - prisskillnader i Sverige 2022
